

Tharun Potharaju

Hyderabad, India — +91 63037 48354 — potharajutharun0@gmail.com — LinkedIn — GitHub

Professional Summary

Java Full Stack Engineer with 2 years of experience developing RESTful web applications and microservices using Java, Spring Boot, Spring Security, and React.js. Experienced in designing scalable backend systems, optimizing MySQL queries (improved response time by 70%), integrating AWS S3 and Apache Kafka, and deploying applications using Docker on Linux environments. Proficient in JWT/OAuth 2.0 authentication, Git, Jenkins, and Agile development practices.

Technical Skills

- Languages:** Java, JavaScript (ES6+), SQL
Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Node.js, Express.js, REST APIs, Microservices
Frontend: React.js, Redux, HTML5, CSS3
Databases: MySQL, Hibernate/JPA, Database Schema Design, Query Optimization
DevOps & Cloud: Docker, Kubernetes, Apache Kafka, AWS S3, Git, Jenkins, Maven, Linux, Nginx
Networking & Security: TCP/IP, DNS, HTTP/REST, JWT, OAuth 2.0, bcrypt, Role-Based Access Control (RBAC)
Methodologies: Agile/Scrum, SDLC, Code Reviews, Global Exception Handling

Professional Experience

Techno Communications Global Pvt Ltd Hyderabad, India
Software Engineer – Java Full Stack July 2024 – Present

- Developed RESTful APIs and microservices using Java, Spring Boot, Spring MVC, and Spring Data JPA, containerized with Docker for deployment on Linux environments.
- Designed database schemas and optimized MySQL queries using indexing and pagination, improving API response time by approximately 70% for datasets exceeding 10K records.
- Developed reusable React.js components with Redux for state management and integrated frontend with REST APIs.
- Implemented authentication and authorization using Spring Security, JWT, OAuth 2.0, bcrypt, and RBAC.
- Integrated Apache Kafka for asynchronous event-driven communication between services to improve application scalability and reduce service dependencies.
- Integrated AWS S3 using pre-signed URLs to securely manage 300+ production file uploads.
- Used Git, Jenkins, Linux, and Nginx for source control, build automation, deployment, and application hosting.
- Collaborated with cross-functional teams in an Agile/Scrum environment, participating in sprint planning, code reviews, testing, and production support.

Key Projects

Secure Authentication Microservice
Spring Boot, Spring Security, Spring Data JPA, MySQL, JWT, OAuth 2.0, Docker, Git

- Built a standalone authentication service using Spring Boot, Spring Security, and Spring Data JPA, implementing REST APIs for user registration, login, and account management.
- Implemented authentication and authorization using JWT, OAuth 2.0, bcrypt, and Role-Based Access Control (RBAC), and containerized the application using Docker.

Enterprise Multi-Role Ticketing System
React.js, Spring Boot, REST APIs, MySQL, Apache Kafka, AWS S3, Docker, Git

- Developed a full-stack ticket management application using Spring Boot, React.js, and MySQL, supporting multiple user roles with secure REST API integration.
- Integrated Apache Kafka for asynchronous event processing, AWS S3 for secure file storage, and Docker for containerized deployment while optimizing MySQL queries for improved application performance.

Certifications & Training

- Test Automation in Java** – EPAM Campus (*June 2025 – ID: AAAAY2W*)
- Java Full Stack Development** – Talent Sprint (*Core Java, Spring Boot, Hibernate, REST APIs, SQL*)

Education

Kakatiya University Warangal, India
Bachelor of Technology in Information Technology (CGPA: 8.2/10) 2019 – 2023
